## Radius Charger Connecting Cables

When connecting Radius Charger to your electricity source, you will need the following parts.

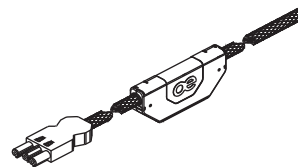

Important! Always shut off power to the circuit before starting installation work. In some countries electrical installation work may only be carried out by a authorised electrical contractor. Contact your local electricity authority for advice.

### Radius Charger

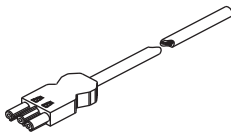

1 x Radius Charger  
(Green)

### Starter Cable (Standard: 1 cable per configuration)

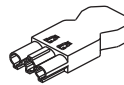

1 x Starter Cable  
(Orange)

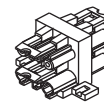

### Cable Kit (Standard: 1 kit per bench)

1 x Interconnector Cable  
(Yellow)

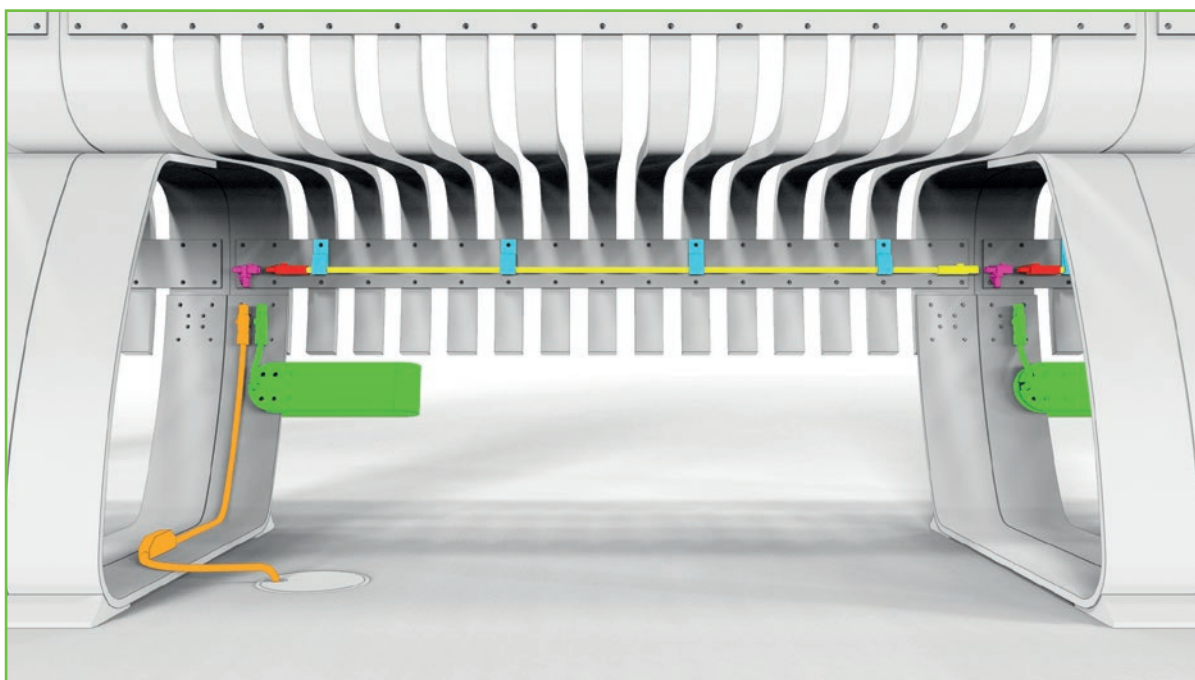

1 x Slimline Male Wieland  
(Red)

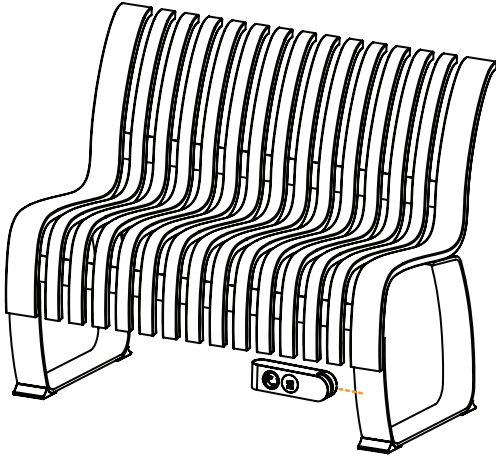

1 x Wieland Adaptor Block  
(Purple)

4 x Cable Clip  
(Blue)

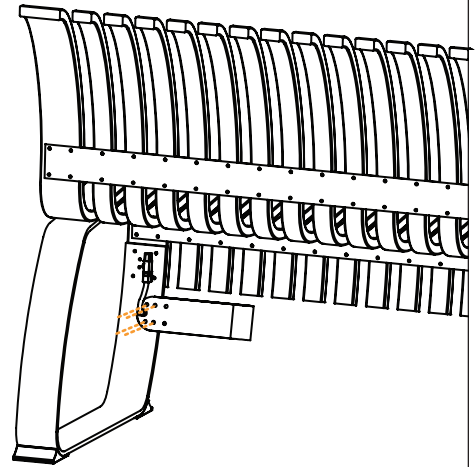

1

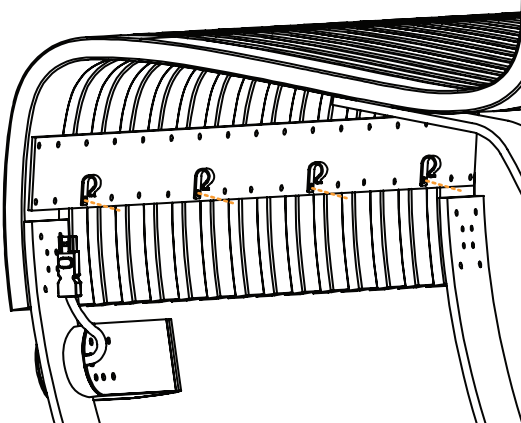

Mount the charger on one of the benches legs.

2

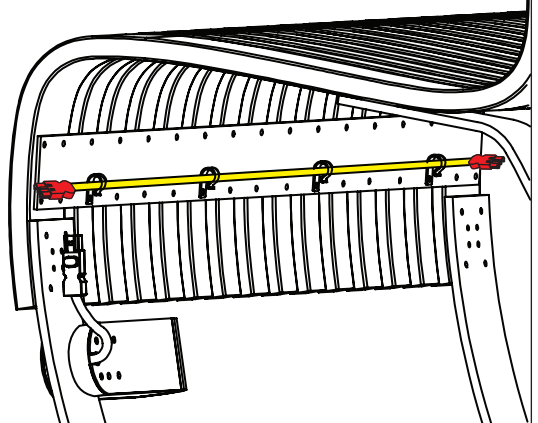

Use bolt A to tighten the charger to the leg. Use the four holes closest to the edge.

3

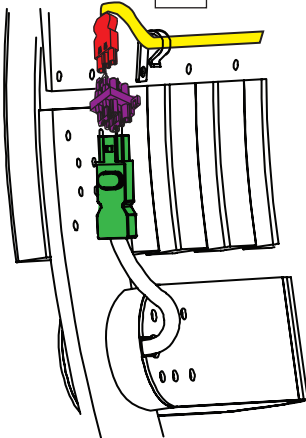

Remove 4 of the current screws at the bottom of the metal strip. Then use screw A to attach the cable clips to the available holes.

4

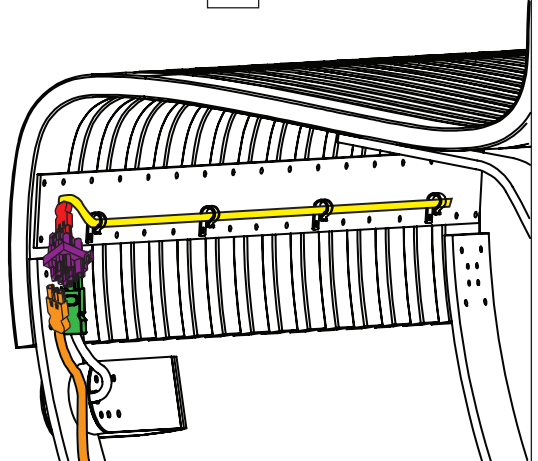

Attach the Interconnection cable to the bench using the clips.

5

Connect the interconnection cable to the charger with the Wieland Adaptor Block.

6

Connect the Wieland Adaptor Block to the Starter Cable that goes in to the electricity source.
