Note:
Low energy light bulbs are recommended to all different Leaf Lamp models.
Leaf Lamp Pendant 130

Assembly instructions

- Leaf Lamp Pendant 130: S. 10-11
- Leaf Lamp Tree 130: S. 12-14
- Leaf Lamp Tree 230: S. 15-18
- Leaf Lamp Tree 300: S. 19-22
- Leaf Lamp Metal: S. 23-
Step 3
Picture 11-16

1. Assemble the leaf lamp pendant in a circular pattern, ensuring that all parts are securely fastened. Use the provided screws to attach the parts together.

2. Ensure that all parts are aligned correctly and that the lamp is stable when hung.

3. If the lamp is not hanging straight, adjust the position of the parts to achieve a balanced and secure structure.

4. Remember to check for any loose parts or connections after assembly.

5. Once assembled, the lamp should have a 180° angle to ensure proper illumination and aesthetic appeal.

Maintenance Leaf Lamp & Leaf Lamp Tree

Tools: Use an electric leaf blower. If this is not available it's advisable to use compressed air.

Course of action: Clean the lamp at evening or night time and wipe off the floor in the morning. Blow through the whole lamp, this takes about 5 minutes with leaf blower and 30 min with compressed air. Blow so that the leaves flutter, just as they do in nature. If you have multiple lamps in a cluster, repeat the process for each lamp.

Recommended intervals: Clean every 6th to 24th month. Clean up more often where more people move, for example shopping malls or airports, and less often where fewer people move, for example offices. Dust can be seen more easily on colored leaves, so they require a more frequent interval.

Around-the-clock businesses or small scale facilities: Dust off with a dustbin and cross through the foliage.

Warning: Do not use a vacuum cleaner because it will eat the leaves.

1. Leaf Blower
2. Compressed air
3. Duster

No vacuum cleaner
Don't wait to long between cleaning sessions
IMPORTANT
Always shut off power to the circuit before starting installation work. In some countries electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

The crossed-out wheeled bin symbol indicates that the item should be disposed of separately from household waste. The item should be handed in for recycling in accordance with local environmental regulations for waste disposal. By separating a marked item from household waste, you will help reduce the volume of waste sent to incinerators or land-fill and minimize any potential negative impact on human health and the environment. For more information, please contact your seller.
