**Touch up / Maintenance**

For cleaning of the surface use Rubio Monocoat SOAP. The Rubio Monocoat SOAP is available to by in concentrate 1l and 2l cans. The mixture is efficient on most stains. Use a microfibre cloth. Scratches can be touched up by local treatment with Rubio Monocoat Oil Plus 2C. Use the natural or pigmented oil depending on the ribs original treatment. Small damages will be less visible and the oil gives the injured surface back it's surface protection. Maintenance cycle depends on rate of use/wear.

**Touch up on scratched ribs**

Use the Rubio Monocoat Plus 2C oil to touch up the top layer of the wooden parts of the bench. This is a two component mixture. One can is the natural or pigmented oil and one can is the hardner. Mixture ratio is 3-1. Continius surface care minimizes visable scratches and marks. This treatment will help protect the bench.

<p>1: Dark Oak rib</p>	<p>2: Scratched Dark Oak rib</p>	<p>3: Clean area with sandpaper or cloth</p>
<p>4: Mix the two components, ratio 3-1.</p>	<p>5: Spread out a small quantity of the mix with a cloth.</p>	<p>6: Let the oil absorb during a few minutes.</p>
		<p><b>Note</b> The product may NOT be diluted! Cloths, saturated with oil, may spontaneously combust. After usage, they need to be soaked in water before disposal.</p>
<p>7: Remove all excess oil with a dry cloth.</p>	<p>8: Treated Dark Oak rib. Let dry for at least 12h.</p>	

### Tightening the screws

Depending on humidity, screws and bolts may need to be tightened 3-6 months after delivery, otherwise the construction may become loose (applies to all wooden structures). Check the screws and bolts once a year.

If armrests or tables have been kicked or used in a wrongful way the bolts and screws should be tightened so that they never get a chance to start to loosen.

### Replace rib

If for any reason you need to change any of your ribs, it's easy to do.
